

# GLAPOR®

Did you know?

Why choose  
GLAPOR® SG600  
Foamed Glass Gravel?

Clean, crisp installation:  
GLAPOR® SG600 recycled  
foamed glass gravel takes  
the place of separate  
hardcore and insulation in a  
conventional concrete floor.

Insulating – Class Leading  
Thermal Conductivity of  
0.078W/m2k

Load-Bearing – Provides  
Excellent Compressive  
strength - 275KN/m2

Non-combustible

100%

Made from 100% Recycled  
Glass, using renewable  
energy sources.

Lightweight – 95-120Kg per m3  
Bag– Easy to install, Low impact  
construction: Ideally suited to  
sensitive sites such as churches  
over archaeology. Delivery costs  
are greatly reduced.

An ability to buffer moisture  
vapour : Ideal for use within  
existing solid wall properties

Resistant to fungi,  
mould, rodents and frost

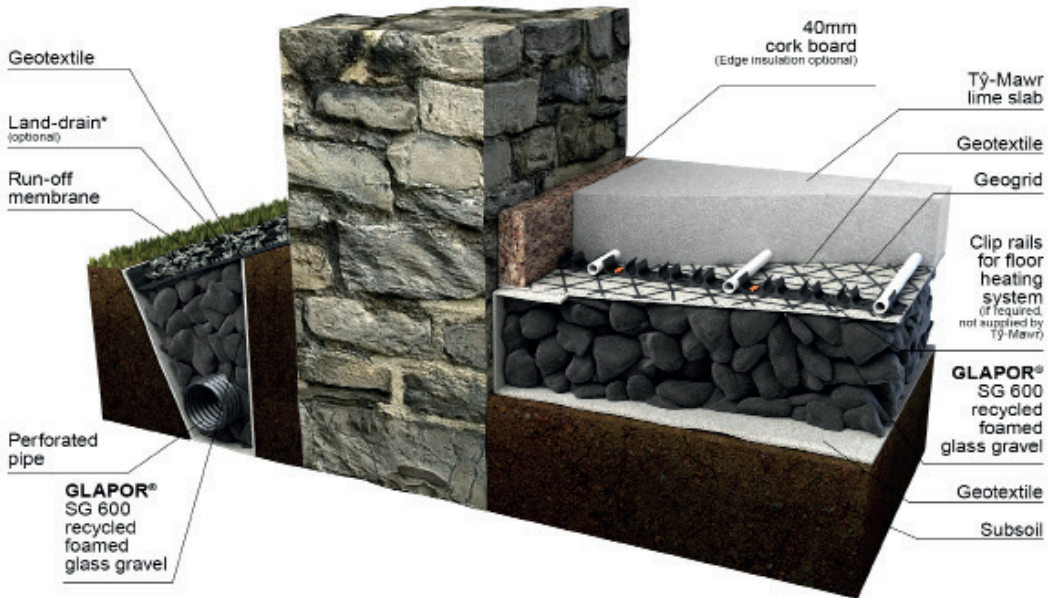

150mm Minimum Depth –  
Saving time and Material  
Costs.

## the *sublime* insulated limecrete floor

Please contact us for a technical sheet or for u-value calculations, condensation risk analysis, and/or quotations.  
Please note that LABC registered detail only applies where Ty-Mawr has designed the build-up (free of charge) and supplied the materials.
